

**ELECTRO DERMAL SCREENING**

**C**omputerized, painless electro-dermal screening analyzes galvanic skin response to determine imbalances in organs, glands and body systems. Tests provide highly accurate assessments of all organs and body systems, pinpointing allergies, nutrient deficiencies, toxins, hormonal imbalances, organ and endocrine function, and more. It can also test medications and supplements for efficacy. ~

**Providence Place Health & Wellness** Ft Erie  
EAV Testing *see ad front cover*

**S**afe, painless, natural, non-invasive diagnostic procedures provide valuable information about your health quickly and with no discomfort, side-effects or risks. They are not intended to replace orthodox medical testing, but may provide a new perspective and critical information such as the root cause of your health issues, that may not be considered by your physician. ~

*See also Chiropractic, Naturopaths, Nutritional Support*

**IRIDOLOGY**

**T**here are more than 2,000 fibres in the iris of your eye connecting to every organ and system in your body. The quality of these fibres reveals the condition of every organ and body system and can, therefore, provide an intricate blueprint of your state of health including organ and tissue conditions, predispositions, toxins, nutrient deficiencies, digestive problems and overall constitution. Analysis measures four stages--acute, subacute, chronic and degenerative. Iridology's greatest asset is its ability to forewarn of

approaching problems, allowing prevention. Analysis is performed either visually or via computer. ~
