Owning a pet is good for your health! Studies show that people live longer when they have pets.

Animals thrive when provided with natural food, natural nutritional supplements, natural remedies, and non-invasive holistic therapies. They perform better, stay healthier, are happier and more emotionally balanced, and live longer. As a rule, any natural therapy that benefits humans will provide similar benefit to animals. However, care and expertise must still be exercised. Never give medications or supplements designed for humans to an animal unless you first check with your veterinarian. ~
